Semester: Fall 2025

Student Name: MD. HASIBUL HASAN HASIB

Student ID: 253-35-645

Batch: 46

Section: B

Course Code: SE112

Course Name: Computer Fundamentals Lab

Course Teacher Name: Mr. K. M. Shahriar Islam

Designation: Lecturer

Submission Date: 14 /12/2025

Microsoft Word

Microsoft Word is one of the most popular word processing programs. It is flexible and easy to use for creating, editing, and formatting documents. Whether you're writing a simple letter, preparing a resume, or working on a formal report, MS Word offers a great set of tools to help you create professional and well-structured content. With features like text formatting, inserting tables and images, page layout options, and built-in templates, users can manage a variety of document tasks efficiently.

Follow these simple steps to open MS Word on your personal computer:

Start → All Programs → MS Office → MS Word.

Microsoft Word Interface

The Microsoft Word interface is designed for creating and editing documents.

File Menu: The File tab will bring you into the Backstage View. The Backstage View is where you manage your files and the data about them – creating, opening, printing, saving, inspecting for hidden metadata or personal information, and setting options.

Ribbon: An area across the top of the screen that makes almost all the capabilities of Word available in a single area.

Tabs: An area on the Ribbon that contains buttons that are organized in groups. The default tabs are Home, Insert, Design, Layout, References, Mailings, Review, View and EndNote X5.

Title Bar: A horizontal bar at the top of an active document. This bar displays the name of the document and application. At the right end of the Title Bar is the Minimize, Maximize and Close buttons.

Groups: A group of buttons on a tab that are exposed and easily accessible.

Dialog Box Launcher: A button in the corner of a group that launches a dialog box containing all the options within that group.

Status Bar: A horizontal bar at the bottom of an active window that gives details about the document.

View Toolbar: A toolbar that enables, adjusts, and displays different views of a document.

Zoom: Magnifies or reduces the contents in the document window.

Quick Access Toolbar: A customizable toolbar at the top of an active document. By default, the Quick Access Toolbar displays the Save, Undo, and Repeat buttons and is used for easy access to frequently used commands. To customize this toolbar, click on the dropdown arrow and select the commands you want to add.

Tell Me: This is a text field where you can enter words and phrases about what you want to do next and quickly get to features you want to use or actions you want to perform. You can also use Tell Me to find help about what you're looking for, or to use Smart Lookup to research or define the term you entered.

Contextual Tabs are designed to appear on the Ribbon when certain objects or commands are selected. These tabs provide easy access to options specific to the selected object or command. For example, the commands for editing a picture will not be available until the picture is selected, at which time the **Picture Tools** tab will appear. I will discuss it the later part in **Drawing Tools** and **Picture Tools** .

Microsoft Word Tabs Explained

Now let us discuss the tabs and components of MS Word. With these tabs, you can perform different operations on your documents. You can create, delete, style, modify, or view the content of your document.

1.FILE

It includes options related to the file, such as New (to create a new document), Open (to open an existing document), Save (to save the document), Save As (to save documents), History, Print, Share, Export, and Info.

2. Home

It is the default tab of MS Word and it is generally divided into five groups, i.e., Clipboard, Font, Paragraph, Style and Editing. It allows you to select the color, font, emphasis, bullets, position of your text. It also contains options like cut, copy, and paste. After selecting the home tab, you will get below options:

➤ Font

3. Insert

Add content like tables, images, hyperlinks, charts, word art, date and time, headers, footers, shapes, text boxes, equations, and more to your document.

4. Design

It is the fourth tab in the ribbon or menu bar. You can choose from a variety of document designs on the design tab, including ones with centered titles, offset headings, left-justified text, page borders, watermarks, page color, and more, as seen in the image below:

5. Layout

On the menu bar or ribbon, it is the fifth tab. It contains all the settings that let you customize the layout of the pages in your Microsoft Word document. As seen in the image below, it has features like line breaks, control page orientation and size, set margins, display line numbers, set paragraph indentation, and lines apply themes:

➤ Page orientation:

Word offers two page orientation options: landscape and portrait. Landscape means the page is oriented horizontally. Portrait means the page is oriented vertically.

To change page orientation :

1. Select the Layout tab.
2. Click the Orientation command in the Page Setup group.

3. A drop-down menu will appear. Click either Portrait or Landscape to change the page orientation.

4. The page orientation of the document will be changed.

➤ Page size

By default, the **page size** of a new document is 8.5 inches by 11 inches. Depending on your project, you may need to adjust your document's page size. It's important to note that before modifying the default page size, you should check to see which page sizes your printer can accommodate.

To change the page size:

Word has a variety of **predefined page sizes** to choose from.

1. Select the **Layout** tab, then click the **Size** command.

2. A drop-down menu will appear. The current page size is highlighted. Click the desired **predefined page size**.

3. The page size of the document will be changed.

➤ Page margins

A **margin** is the **space** between the text and the edge of your document. By default, a new document's margins are set to **Normal**, which means it has a one-inch space between the text and each edge. Depending on your needs, Word allows you to change your document's margin size.

To format page margins:

Word has a variety of **predefined margin sizes** to choose from.

1. Select the **Layout** tab, then click the **Margins** command.

2. A drop-down menu will appear. Click the **predefined margin size** you want.

- **Last Custom Setting** – Shows the most recent margin values that the user manually set.
- **Normal** – Sets standard margins (1 inch on all sides). Used for most documents.
- **Narrow** – Reduces margins (0.5 inch on all sides) to fit more content on a page.
- **Moderate** – Uses slightly smaller side margins than Normal for a balanced layout.
- **Wide** – Increases left and right margins, often used for comments or binding.
- **Mirrored** – Sets inside and outside margins for double-sided printing (books or reports).
- **Office 2003 Default** – Applies the margin settings used in older versions of Word.
- **Custom Margins** – Opens a dialog box where users can set exact margin values manually.

3. The margins of the document will be changed.

6. References

It is the sixth tab present in the menu bar or ribbon. The references tab lets you add references to a document, then create a bibliography at the end of the text. The references are generally stored in a master list, which is used to add references to further documents. It includes options like, Table of Contents, Footnotes, Citations & Bibliography, Captions, Index, Table of Authorities, smart look, etc. After selecting References tab, you will get the below options:

7. Mailings

It is the seventh tab present in the menu bar or ribbon. It is a least used tab in the menu bar. This tab is where you would create labels, print them on envelopes, do mail merge, etc. After selecting mailing, you will get the below options:

8. Review

It is the eighth tab present in the menu bar or ribbon. The review tab contains, commenting, language, translation, spell check, word count tools. It is good for quickly locating and editing comments. After selecting a review tab, you will get the options below:

10. View

It is the ninth tab present in the menu bar or ribbon. View tab allows you to switch between single page or double page and also allows you to control the layout tools. It includes print layout, outline, web layout, task pane, toolbars, ruler, header and footer, footnotes, full-screen view, zoom, etc. as shown in the below image:

In conclusion, this lab report provided a detailed overview of the major tools and features of Microsoft Word along with their visual representations. Through this practical exploration, we gained a clear understanding of how different components such as menus, ribbons, and formatting tools work together to create, edit, and manage documents efficiently. This lab enhanced our practical skills and improved our confidence in using Microsoft Word for academic and professional purposes. Overall, the knowledge gained from this lab will be helpful for preparing well-structured documents in future tasks.
